

Fairness - Pre-K to 2nd Family Resource

What is BrainAbouts?

BrainAbouts is a prevention and early intervention ecosystem that empowers young people to make positive choices, supports parents, and helps school staff overcome implementation obstacles with brain-based programming.

Learning about Fairness- Students learned that...

1. Being fair means treating others with kindness and respect. It is about sharing, taking turns, and playing by rules that leave everyone feeling included.
2. Fairness isn't about everyone winning - it's about everyone having the opportunity to feel included and allowing people to have an equal chance at success.

Family Connection

1. Describe a time you felt something was unfair, and how you resolved it.
2. Discuss the difference between things being fair, and things being equal.
3. Sing the "Fairness Song" together, and let your child teach you the tune!

Fairness Song
